### ESSENTIAL JOB FUNCTIONS

Essential job functions are the fundamental duties of a position: the things a person holding the job absolutely must be able to do.

To actively support and uphold the City's stated mission and values. To perform a variety of technical duties involved in the sampling and biological analysis of water quality throughout the City's water storage, treatment and distribution systems. To conduct sampling and testing from our industrial and commercial dischargers and storm runoff sites.

## OTHER DUTIES AS ASSIGNED

Please note this job description is not designed to cover or contain a comprehensive listing of all activities, duties or responsibilities that are required of the employee for this job. Duties, responsibilities and activities may change at any time with or without notice.

- Perform job duties adequately and properly; follow personnel and department policies and operating procedures; show respect, tact, and courtesy in dealings with coworkers and the general public; behave in a manner that does not obstruct or hinder other employees from completing their duties; act in a manner that is safe and follow the City's safety procedures at all times.
- Collect drinking water, wastewater, stormwater and soil samples; conduct a variety of chemical, biochemical and bacteriological tests including chlorine residual, turbidity, alkalinity, temperature, and pH; analyze samples for bacterial content;
- Operate a variety of laboratory and field equipment including pH meters, turbidimeters, colorimeters, microscopes, incubators, autoclaves, calculators and computers; prepare solutions and reagents for various chemical analyses; maintain, clean, service and repair laboratory and field equipment;
- Order supplies; perform bottle inventory; dispose of samples and maintain equipment maintenance files;
- Coordinate the activities related to the ADEQ mandated drinking water monitoring and sampling program. Participate in the selection of distribution, storm and waste monitoring locations. Coordinate a schedule, draw and record sample site as built for sampling events, and schedule field visits for the needed quantity and timing of sampling with City staff and independent contractors; gather, handle, test, document, and report results for needed samples;
- Use proper techniques to ensure that all samples collected are properly preserved and identified for submittal to the laboratory for analysis;
- Conduct water quality inspections of new main connections and water main repairs to the City water distribution system for compliance with Maricopa Association of Governments (MAG) and American Water Works Association (AWWA) requirements for disinfection, detention time and water quality, following MAG requirements. Coordinate sampling times and communicate specifics of each site along with test results with City Engineer and independent contractors;
- Investigate water customer inquiries as a first-line customer service responder; schedule field visits, gather samples, conduct tests, analyze and report results, and coordinate remedial action as appropriate;
- Conduct and coordinate special projects with outside sources such as consultants, laboratories, and universities;

- Operate and maintain a vehicle; fuel and maintain proper fluid levels; report necessary repairs to appropriate maintenance staff; and operate a two-way radio;
- Maintain quality control records (chain of custody forms, logbooks, and laboratory workbooks), calculate data, enter data into a LIMS database, prepare new main inspection reports and interpret results;
- Aid in preparing the water sampling plans and write compliance reports as well as review and revise SOP's within work area;
- Communicate with supervisor, laboratory personnel, other city departments, the general public, and contractors;
- Review and research regulations, procedural updates and water quality issues to stay current on changes;
- Perform related duties as assigned;
- Physically present to perform the duties of the position.
